

**The friendliest
electronic typewriter ever made!
Simple. Smart. And silent.**

AP 300

precision for productivity
Canon
ELECTRONIC TYPEWRITERS

Error-eliminating electronic typing for everyone.

AP300's outstanding features:

Fully electronic typing with Canon's friendly keyboard.

Specially designed for simplicity, the keyboard is essentially the same as found on conventional typewriters. This makes the change to electronic typing smooth and effortless. Even the novice typist will soon be producing documents with a truly professional touch.

You will find key height lower than that of the competition, so you can use the 300 on a standard office desk. And high priority was given to quiet operation with soundproofing so thorough that the AP300 is the quietest typewriter in its class.

Large 15-character liquid crystal display and fast correction.

Over 90% of the most common errors can be eliminated with the display and the AP300's full one-line memory. You can check the text on the display, 15 characters at a time, before anything is typed on paper. If you notice a mistake on the display or anywhere on the current typing line, simply backspace to the error. Touch the cancel key. Then type the correct character and push the relocate key to return to the previous typing position. And continue typing.

This is one of the most powerful advantages of the AP300 — most errors are eliminated and corrections are made without wasting time. On-display deletions and insertions are equally simple.

Durability of the highest order.

Specifically designed for heavy-duty use, the AP300 is the ideal standard office typewriter. Canon's expertise in advanced electronics and precision mechanics assures you of high performance year-in and year-out. Fewer moving parts further enhance reliability and also contribute to the AP300's unusually low noise level that is so important for a pleasant office environment.

The advanced, practical way to increased office productivity.

Destined to be the most popular standard office typewriter, Canon's new electronic AP300 is simple, smart and silent. With the AP300, any typist can easily and quickly eliminate over 90% of all typing errors. Carefully designed to be user-friendly, this new Canon offers professional electronic typing even for the novice. Since it's the quietest machine in its class, the AP300 contributes to a more productive office environment. And since Canon has made the AP300 exceptionally durable, it is an excellent value.

The design concept behind this advanced typewriter is eminently practical: to eliminate the tedium from typing by making typing easier, quicker and quieter than ever before. And to do this by using sophisticated microcomputer functions that are truly simple to use. Sophisticated electronics of the future for simplicity right now: the AP300.

Canon's concept is realized by a number of outstanding features. There's a 15-character liquid crystal display and

full one-line correction memory. The keyboard is just about the same as found on conventional typewriters with seldom-used switches behind a panel. Automatic carrier return, justified text printout, page end function, and automatic centering radically reduce typing drudgery. Over a decade of in-depth experience in advanced electronics and precision mechanics are behind the AP300.

Canon's original ideas and innovative technology have been focused on meeting a wide range of consumer needs, making Canon a recognized leader in a number of fields, including office automation. Drawing upon all its resources, Canon's top design and engineering team has now created the friendliest electronic typewriter ever made.

The results are before you. Microcomputer benefits are now immediately available to everyone. Productivity is increased. Work becomes more enjoyable. And typing stress is radically reduced. The Canon AP300: the smart and quiet standard typewriter for today's office.

Flexible page organization with automatic functions.

Any two line formats of your choice can be stored and instantly recalled. (Up to 20 tabs and decimal tabs can be set to each format.) No need to reset margins, tabs and decimal tabs for everyday typing tasks.

Justified printout is the quickest and most foolproof way to create documents of the highest quality.

Carrier return is automatic. Paper is indexed and the carrier returned to the left margin of the following line. This frees the typist from thinking about mechanics so the focus is on typing.

Text is automatically centered between margins or tabs. Nothing to calculate, nothing to guess about. A big time saver.

Underlining is simultaneous when typing or correcting words or entire lines.

Block indentation is swiftly accomplished by setting a temporary left margin that differentiates any section from the main body.

The automatic page end function means you never have to worry about how much space is left on a page.

Right margin alignment for dates, signatures, etc. is fully automatic. The easy way to producing professional looking documents.

Decimal tabulation for aligning numbers in columns is automatic by using preset decimal tabs. Another Canon convenience.

Numbers are automatically punctuated with a comma or a space after every third digit during decimal tab operations.

You always type in the right pitch because the AP300 automatically matches the pitch to that of the Canon daisy wheel selected.

Easy ribbon and daisy wheel changing.

Further proof that every aspect of the AP300 has been made user-friendly is the convenient access to both ribbon and daisy wheel. Changing either is quick, simple and clean. You can choose from over a dozen typefaces now, with more available all the time.

Specifications

Print Unit

Print Element: Daisy wheel: 96 characters
 Print Speed: 16 characters per second
 Print Pitch: Automatic or selectable
 10 char./inch: 132 char./line
 12 char./inch: 158 char./line
 15 char./inch: 197 char./line
 Line Spacing: 1, 1-1/2, and 2 lines
 Paper Capacity: 420mm (16-1/2 inches)
 Typing Line: 335mm (13-1/5 inches)
 Ribbon Cassettes: Correctable, single-strike, multi-strike
 Correction Tape: Lift-off for correctable ribbon
 Cover-up for single/multi-strike ribbon

Keyboard

Fully Automatic Keys: 46 or 48 keys (varies by country)
 Key Buffer: 89 characters
 Key Pitch: 19.05mm (3/4 inch)
 Key Stroke: 4mm (1/8 inch)
 Special Function Keys: Center, Indent, Relocate, Decimal Tab, Code, Cancel
 Automatic Selectors: Pitch, Line Space, Numeric Punctuation, Keyboard, Automatic Carrier Return/Justified Printout, Automatic Underline, Operation, Impression Control, Ribbon

Correction Memory: 1 full line (maximum 350 char.)

Line Format Storage: Margins — 2 sets
 Tabs and decimal tabs — 2 sets of 20 positions

Display Type: 5 × 11 dot liquid crystal display

Display Capacity: 15 characters

Electrical Requirements: AC115V (±15%) 85W 50/60Hz
 AC120V (−15%/ + 10%) 1A 60Hz
 AC230V (±15%) 85W 50Hz

Operating Temperature: 10°C—35°C (50°F—90°F)

Ambient Humidity: 20%—85%

Dimensions: 52cm (W) × 49cm (D) × 17cm (H)
 (20-1/2 in. × 19-3/10 in. × 6-7/10 in.)

Weight: 17.7 kg (39 lbs.)

Subject to change without notice.
